Geometris 87/88
Fleet Tracking Device

Installation & Reference Guide for Installers

Procedure
1. Perform a vehicle check before starting installation.
2. Confirm vehicles and labels (i.e. "#001" [or] "Digger").

Installation Instructions

• Mounting: Mount the device with the label up, with best view of the sky from *under* the vehicle dash. Do not mount in the engine compartment or anywhere outside the cab of the vehicle. Do not mount directly on top of the AM/FM radio.

✓ Good mounting locations.

✗ Areas to avoid.

• Wiring: Run wiring to the power connection location. Secure all loose wiring with tape and/or tie straps. Power harness should be void of any moving objects, such as the parking brake or steering wheel.

1. Remove existing port, and install Y-Adapter
2. It is recommended to **Start vehicle 1st ,** then plug in device

Harness Options

L.E.D. Status

GRN Device Status [Good: slow blinking]

GRN Device Status [Ignition: fast blinking]

RED Error Status [(2) cellular | (3) GPS]

Device Testing & APP Usage

1. Open the Temeda APP
2. Assign the Device to the Asset and fill in all Asset Details and Save to Create the Asset.
